

SITKA POWER

**Notice of Proposal to Engage in a Renewable Energy Project
By Sitka Power Inc.**

Chatsworth Solar Project
Township of Chatsworth, Grey County

Project Name: Chatsworth Solar Project
Project Type: Class 3 Solar Photovoltaic Electricity Generation Facility
Proponent / Developer: 1001285733 Ontario Inc.
Estimated Generating Capacity: 15.75 MWac
Location: 317098 Highway 6 & 10, Chatsworth ON N0H 1G0
IESO Reference Number: LT2e1-9645
Municipality: Township of Chatsworth, Grey County

Sitka Power Inc. is planning a renewable energy project for which a Renewable Energy Approval is required. This notice is distributed in accordance with section 15 of Ontario Regulation 359/09, pursuant to Part V.0.1 of the Environmental Protection Act, before an application is submitted to the Ministry of the Environment, Conservation and Parks.

The proposed facility is a solar photovoltaic electricity generation site, classified as a Class III solar facility under Ontario Regulation 359/09. If approved, it would have a total maximum nameplate capacity of 15.75 MWac (17.81 MWdc). The Project's location is shown on the map (see Figure 1).

The Project responds to the Independent Electricity System Operator's (IESO) Long-Term 2 energy stream (LT2(e-1)) procurement process, which aims to secure clean electricity resources for Ontario's future needs and energy transition. The Project was submitted on October 16, 2025, with a decision expected by April 16, 2026.

Located at 317098 Highway 6 & 10, the Project is to be located within the 187 acres of privately owned land in the Township of Chatsworth, Grey County. The site is accessible by municipal roads and is close to existing electrical transmission infrastructure.

Development Partners

Sitka Power's management team has extensive experience in developing, owning, and operating renewable energy assets, including solar, wind, run-of-river hydro, and battery energy storage projects. Currently, Sitka owns and operates six solar projects, one wind project, and one battery project in Ontario; one solar project in Saskatchewan; four run-of-river hydro projects; and a regulated distribution company in British Columbia.

Project Details

The Project has been designed to avoid impacts on protected areas under provincial plans and policies. Preliminary assessments—including technical, environmental, geological, and planning studies—were conducted to evaluate site suitability and identify constraints and opportunities (Figure 2). The project lands are designated Rural - (A1) - and Environmental Protection (AP) under the Grey County Official Plan. A desktop constraints analysis was conducted, and the design of the solar project area was reduced to avoid the high-constraint regions. Furthermore, the Project site will remain west of the known gas line (Figure 3) to adhere to the pipeline's right-of-way and respect the Township of Chatsworth's request to reduce the visibility of the Project. Site investigations will be conducted to determine if medium-constraint areas, mainly woodlands, are significant. If significant, further avoidance or mitigations will be addressed in the Project Description Report.

Sitka will incorporate agrivoltaics best practices, combining solar electricity generation with active agricultural land use. The design supports existing farming activities, promotes biodiversity, improves water retention, and offers additional farm revenue.

The project is being proposed in accordance with all applicable requirements. The Project Description Report provides further details and will be updated as development progresses.

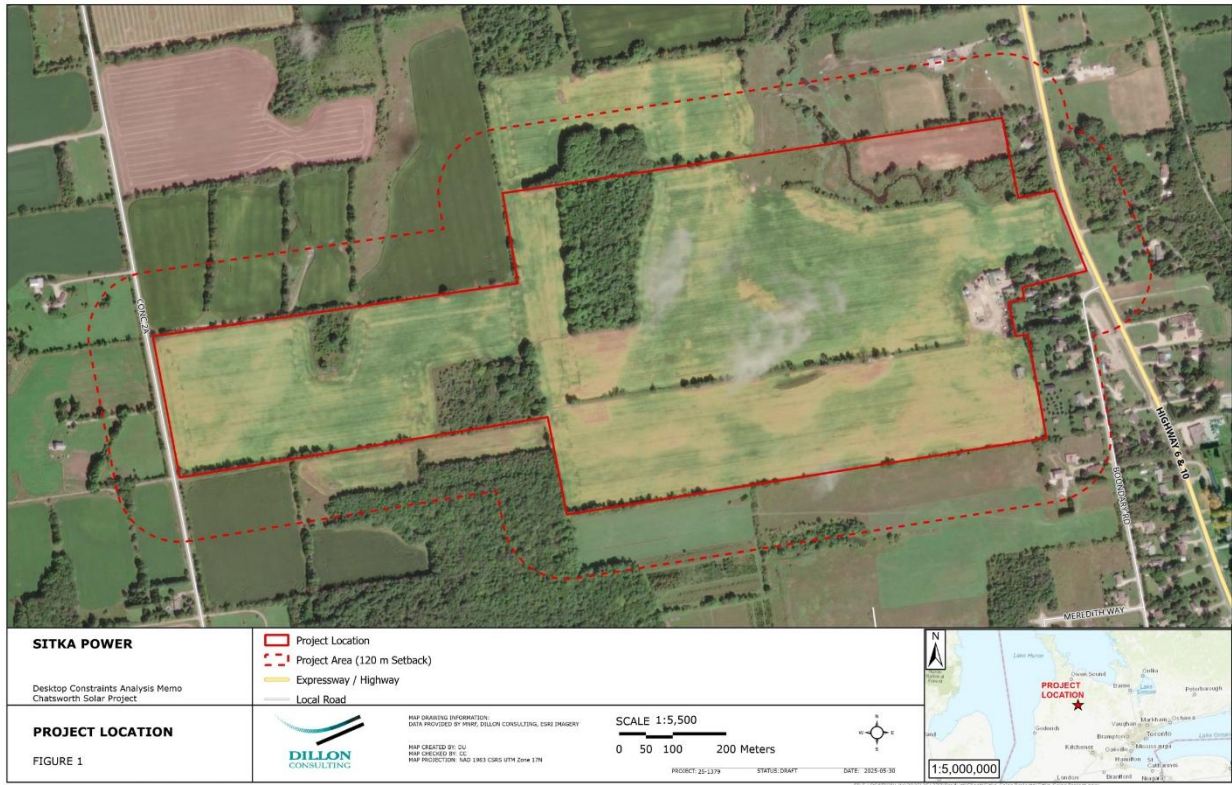

The Draft Project Description Report and Studies (as available) can be found online at <https://sitka-power.ca/chatsworth-solar/> and electronic copies can be requested from chatsworth.solar@sitka-power.ca. Furthermore, Sitka is in process of conducting studies to prepare supporting documents in order to comply with the requirements of the Act and Regulation.

Notice of Public Meeting
By Sitka Power Inc.
Chatsworth Solar Project
Township of Chatsworth, Grey County

Project Name: Chatsworth Solar Project
Project Type: Class 3 Solar Photovoltaic Electricity Generation Facility
Proponent / Developer: 1001285733 Ontario Inc.
Estimated Generating Capacity: 15.75 MWac
Location: 317098 Highway 6 & 10, Chatsworth ON N0H 1G0
IESO Reference Number: LT2e1-9645
Municipality: Township of Chatsworth, Grey County

Sitka Power Inc. is planning a renewable energy project for which a renewable energy approval is required. This notice is distributed in accordance with section 15 of Ontario Regulation 359/09, pursuant to Part V.0.1 of the Environmental Protection Act, before an application is submitted to the Ministry of the Environment, Conservation and Parks.

The proposed facility is a solar photovoltaic electricity generation site, classified as a Class III solar facility under Ontario Regulation 359/09. If approved, it would have a total maximum nameplate capacity of 15.75 MWac (17.81 MWdc).

Pursuant to the Act and Regulation, the facility, in respect of which this project is to be engaged in, is a Class 3 Groundmount Solar Photovoltaic Facility. If approved, this facility would have a total maximum name plate capacity of 15.75 MWac. The project location is described in the map (Figure 1).

Meeting Location

PUBLIC INFORMATION SESSION DETAILS	
Date:	April 8, 2026
Time:	6:00 PM - 8:00 PM
Place:	Royal Canadian Legion Chatsworth – Branch 464
Address:	339 Garafraxa St, Chatsworth ON N0H 1G0

Representatives from 1001285733 Ontario Inc., comprising of Sitka Power and their development services partner Good Energy Partners, and supporting consultants will be available to answer questions.

Documents for Public Inspection

For more detailed information, the Draft Project Description Report and Studies (as available) can be found online at <https://sitka-power.ca/chatsworth-solar/>. Furthermore, Sitka is in process of conducting studies to prepare supporting documents in order to comply with the requirements of the Act and Regulation.

Copies may also be requested by contacting the Proponent using the information below.
